*Thank you partners & funders
for helping us
conserve our canyon!*

GALLATIN CANYON

The Upper Gallatin Watershed encompasses some of the most ecologically and economically important resources in our county, which provide vital habitat and water for fish, plants, wildlife, and the people who live and recreate in the area.

The presence of noxious weeds in the Gallatin Canyon is directly attributed to human activity, such as construction, recreation, and travel.

The COC cooperative project aims to facilitate effective management of noxious weeds in the Gallatin Canyon to protect the natural resources to the benefit of all who live, visit, and to the benefit of all who rely on them.
